Skills

Software Development, Linux, PHP, Laravel, MySQL, Docker, Leadership, Design Patterns, SOLID, DDD

Experience

Software Engineer

ParsPack • Tehran, Remote   06/2023 - Present
Website: Parspack.com

Part-time Lecturer

MaktabSharif • Tehran, Sharif Science & technology park   12/2020 - Present
Website: MaktabSharif

- **Senior lecturer** for back-end bootcamps covering **programming basics, PHP, Laravel, databases, best practices, design patterns, and deployments**.
- **Mentor and guide** students to become successful and profitable junior back-end developers.
- Successfully trained and introduced over **25 developers** to the community in two bootcamps.

Lead Developer

GuyanAfzar • Tehran, Pardis Technology Park   04/2021 - 05/2023
Website: GuyanAfzar

- Managed a team of developers to improve VOIP solutions and address inefficiencies in past implementations.
- Improved organizational productivity by implementing enterprise communication solutions.
- Developed and delivered customized products for billing platforms that enabled customers to manage costs and monitor call center performance in real-time, leveraging a range of technologies such as **PHP, Python, Node.js, MongoDB, Linux, and Zabbix.**

Backend Developer

FANAP • Tehran, Pardis Technology Park   10/2018 - 04/2020
Website: FANAP

- Developed and implemented solutions to automate business processes, such as enabling online ticket purchases for amusement parks.
- Collaborated closely with stakeholder groups to implement a content-based platform for children and teenagers, ensuring that the platform met the needs and preferences of the target audience.
- Worked on improving system performance and stability, utilizing technologies such as **MongoDB, Redis and MySQL**.

Lead Developer

TaraabarNet • Tehran, Pardis Technology Park   05/2017 - 10/2018
Website: TaraabarNet

- Led the development team at Taraabar.net, responsible for enhancing the national transportation system with new solutions.
- Designed and built large-scale relational databases and created informational databases for analysis purposes by running a web crawler.
- Participated in the data analysis process by identifying relationships and optimizing data fetching.
- Conducted interviews and recruited talented developers, while mentoring them to reach their full potential.
- Conducted code reviews and paired with team members to enhance performance.
- Directed the team using the Scrum and Agile methodology.

Developer Intern

NarinGames • Tehran, Pardis Technology Park   05/2016 - 05/2017
Website: NarinGames

- Transformed the game server infrastructure at NarinGames to enhance user experience and performance.
- Designed and developed custom landing pages and robust back-end APIs that allowed clients to seamlessly interact with the system and access the necessary data they required.
- Restructured the internal network infrastructure by configuring Microtik and NAS, and integrating collaboration and automation software such as GitLab and local mail and chat servers.
